# GALAXY INTEGRATIONS:

ENTERPRISE SYSTEM MANAGEMENT

Galaxy's open architecture allows many different technologies to be integrated into one solution. The unified platform allows control of many systems from a single user interface or as the sole source of data to other systems. Our RESTful API and ODBC connection allows data to freely be shared between multiple system in the enterprise. Make the switch now and take advantage of these many benefits.

BENEFITS:

SINGLE SOURCE
- Make less mistakes by using one system
- Changes are reflected in all systems at once
- Monitor your system from one platform
- Save time by entering data one time
- One system reduces training

FEATURES
- On-premise
- Cloud
- Web or thick client
- ODBC
- API
