

635 HARDWARE SERIES

635 ENCLOSURES

Flexible · Expandable · Complete

Galaxy's 635-series Control Panel provides the most flexible, reliable, and complete access control and security management solution available. The 635-series hardware is robust and capable of supporting virtually any security situation.

Our 635-series Control Panel touts an unsurpassed flexibility that makes it simple to integrate system hardware with the full-featured System Galaxy software. Galaxy supports any combination of access control, biometrics, alarm & monitoring equipment, DVR/CCTV surveillance equipment, visitor & personnel verification, time & attendance, elevator controls, and more.

Galaxy 635-series control panels are modular and easily expanded. Each panel can be uniquely configured to fit the specific requirements of any facility. The panels accommodate the 635-series interface boards in any combination. Inputs, outputs, relays, card readers, and RS-485 devices can coexist in the same panel. So there is no reason to buy more equipment than you need.

ALL CONTROLLER PACKS INCLUDE:

- 18ga powder coat cabinet w/K/Os
- Power Supply(ies)
- Battery(ies)
- Transformers (if applicable)
- 12C Bus Ribbon Cable
- Tamper Switch
- (1) 635 CPU
- (XX) DRM (based on pack selected)
- Factory installed wiring harness
- Cabinet Locks w/ keys
- Rack mount includes slides
- Medium & Large cabinets have removable doors

Galaxy offers its own unique **UNCONDITIONAL 2-YEAR WARRANTY** that covers its entire hardware line. This promise includes repair and replacement for boards and enclosures damaged from natural disasters, fires, personal errors, and everything else.

Galaxy 635 Hardware Line has the following certifications: **FICAM** **DIACAP/RMF** **CE** **UL LISTED**

Galaxy is a simple, single platform that allows boards to intermingle within one cabinet. All 635-series interface boards are "hot-swappable" and intelligent. You can change or add boards while the panel is powered up and operating. And the intelligent design means the boards will synchronize to the system and begin operating within minutes. This provides uninterrupted security during maintenance and upgrades.
