# GALAXY INTEGRATIONS:
BIOMETRICS

Galaxy's biometrics offer one of the most secure options in access control. If you are looking for unbeatable authentication then consider installing one of Galaxy's biometrics systems in your facility. Not only is this convenient security for management, this also makes it easy on your users since they will never forget to bring their ID with them - they are their ID!

BENEFITS:

SECURE
- One of the most secure technologies available
- Cannot be stolen, impossible/extremely difficult to replicate
- All biometric information is kept secure, and is unusable when fraudulently obtained

COST EFFECTIVE
- No physical credentials to purchase over the life of the system & no lost, or damaged credentials to replace.
- Lower Administrative effort managing

CONVENIENT
-Never leave your credential behind. Always with you.

KEY FEATURES

FLEXIBLE: Use biometrics everywhere, or for select, high security areas

FAST: Many searches, less than 1 second for small to medium system populations (1000's).

VARIETY: Many forms of biometric technologies to choose from: Fingerprint, Iris, Facial, Hand Geometry, Finger Vein, etc.
