

GALAXY INTEGRATIONS: PORTABLE READERS

Galaxy's mobile reader offering delivers handheld security authentication from anywhere, anytime. Why only secure the fixed locations when portable readers can help improve security anywhere? Imagine being able to arm security staff with a powerful mobile credential verification solution. Adding mobile identity verification to existing security systems can significantly improve security and safety.

NETWORK ARCHITECTURE

MODES OF OPERATION:

- **Mustering:** Accounting for people after evacuations
- **Verification:** Verifying if person belongs at event
- **Entry/Exit:** Track areas people are in
