

School Visitor Processing

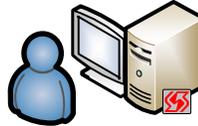

1 Visitor presses call button

- Main Entrance
- Secondary entrances as required

2 Tone announces Visitor to Office Personnel

- Automatic video call up of visitor
- Graphic location of door location

- Administrator verifies identity and/or need for entry.
- Visitor is granted access-door opening is logged.

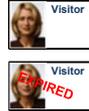

3 Enrollment into Visitor Mgt system

- Drivers license is scanned into system, capturing photo, name, etc.
- Name is compared w/known sex offenders/outstanding warrants/local BOLO/etc.

- All visitors remain in the system eliminating data capture on repeat visits.
- All activity is logged and searchable/reportable

- Visitor photo is captured
- A temporary ID label is printed w/photo
- Self-Expiring label stock is available

School Access Control

Controlled Doors

- Any door that should remain secure, allowing access to only authorized cardholders
- Cardholders gain access using their ID credential if authorized
- System is modular and easily expanded.

- ID Cards should be displayed by all adults. Visitors will have adhesive labels w/ photo.
- Requiring students to display ID only cards increases student accountability and safety

Cardholders

Video Integration

- Any point of the access system can "call-up" a camera when in alarm.
- Cameras can be viewed in the within access system

- A feature of the access system to prevent student "wandering" in between classes.
- allows multiple "Paths & Destinations"
- Ideal for outdoor or portable classrooms.

Hall Pass
